

# FirstCare

## *Beneavin Campus*

Beneavin Campus is a very popular and well-established care facility situated in the heart of the leafy suburb of Glasnevin close to the Botanical Gardens.

The Campus consists of three homes, The House, The Lodge and The Manor.

Whilst each home has its own personality, all encompass FirstCare's Mission

*"to provide the highest quality and safest care for every resident by working collaboratively to promote best practice"*

### *History of the Campus*

The campus originated in 2003 with the building of Beneavin Lodge. It was followed in 2009 by Beneavin House and in 2018 it saw the opening of Beneavin Manor.

It has since progressed into one of the leading care facilities in Dublin.

Beneavin campus work closely with the main Dublin hospitals, north side and south side.

We also work closely with several private institutions providing convalescence care post operatively and medically.

Beneavin Campus provides nursing care for those who are frail, who may have a cognitive impairment and for those who may have dementia. We also provide End of Life and Palliative care along with short term respite and convalescence care.

### *Accommodation*

#### ***Beneavin Lodge founded in 2003***

This warm inviting home is a twin story building and has 70 beds which are configured in 64 single ensuite and 3 twin rooms also en suite.

Facilities include state of the art call bell system, multi-channel TV, lounges, Prayer room, Beautician and Hair Salon and Sensory room

Beneavin Manor has several outdoor private gardens and courtyards. These outdoor spaces are landscaped and designed to cater for those who are cognitively impaired.

## ***Technology***

FirstCare embrace technological advancements and have incorporated this advanced technology into every home. To achieve its mission and vision, FirstCare are the first nursing home group in Ireland to invest in “The UVC Robot”. This high-tech device assists our staff in minimising and reducing the spread of viruses and bacteria. Viruses such as Covid-19 and seasonal influenza are destroyed with this UVC robotic device. The use of The Robot enables our staff to ensure that every bedroom and communal space is decontaminated as effectively and efficiently as possible.

Our use of state-of-the-art computerised documentation systems enables our staff to spend a greater portion of their time with our residents.
