

## *Mountpleasant Lodge - Nursing Home*

Mountpleasant Lodge Nursing Home is a very popular and well-established care facility situated just outside the village of Kilcock in Co Kildare. This Care facility is easily accessed as it is just off the N4, approximately fifteen minutes' drive after Liffey valley shopping Centre. The country setting lends for wonderful outdoor activities in the many landscaped gardens and large courtyards. FirstCare's Mission "to provide the highest quality and safest care for every resident by working collaboratively to promote best practice" is central to the provision of care for every resident in Mountpleasant Lodge.

### *History*

Mountpleasant care facility was established in 2010 and has become synonymous with quality care for those with or without dementia

Mountpleasant works very closely with several Dublin hospitals along with those in Kildare and Laois in the provision of Long- term and Short-term care.

Mountpleasant Lodge provides nursing care for those who are frail, who may have a cognitive impairment and for those who may have dementia. We also provide End of Life and Palliative care along with short term respite and convalescence care.

### *Accommodation*

Mountpleasant Lodge founded in 2010

This warm inviting home is a twin story building and has 81 beds which are all single en suite bedrooms

There are several assisted bathrooms with a state-of-the-art hydrotherapy bathing facility

Facilities include multi-channel TV, lounges, Prayer room, Sensory Room, Beautician, and Hair Salon. Mountpleasant Lodge boast its own "Bar", where residents like to gather for chatting and social events. The large open plan function rooms afford plenty of space for wonderful daily activities to take place.

The outdoor private courtyards boast beautiful, landscaped gardens.

## *Technology*

FirstCare embrace technological advancements and have incorporated this advanced technology into every home. To achieve its mission and vision, FirstCare are the first nursing home group in Ireland to invest in “The UVC Robot”. This high-tech device assists our staff in minimising and reducing the spread of viruses and bacteria. Viruses such as Covid-19 and seasonal influenza are destroyed with this UVC robotic device. The use of The Robot enables our staff to ensure that every bedroom and communal space is decontaminated as effectively and efficiently as possible.

Our use of state-of-the-art computerised documentation systems enables our staff to spend a greater portion of their time with our residents.
